

METHODOLOGICAL ISSUES IN CONSCIOUSNESS RESEARCH

INTERDISCIPLINARY PERSPECTIVES

Organization: David Dupuis, Matthieu Koroma & Raphaël Millière

Friday 26 October 9h30 Salle Dusanne - Neuroscientific perspectives (chair: Matthieu Koroma)

Matthieu Koroma (LSCP, École normale supérieure)
Constructed consciousness

Guillaume Dumas (Institut Pasteur) & Jean-Arthur Micoulaud-Franchi (CHU/Université de Bordeaux)
Psychiatry: a Crash Test for Integrative Neuroscience

Oussama Abdoun (INSERM, CNRL)
New theoretical frameworks for meditation research

Friday 26 October 14h30 Salle des Actes - Anthropological perspectives (chair: David Dupuis)

Arnaud Halloy (University of Nice-Côte d'Azur)
Ethnographic immersion: an added value in the study of the diversity of states of consciousness?

David Dupuis (Durham University)
Ethnographizing the hallucinated consciousness. The contribution of the ethnographic method to the phenomenology and etiology of hallucinations

Samuel Veissière (McGill University)
Thinking through other minds: a variational approach to consciousness, cognition, and cultural affordances

Maddalena Canina (Northwestern University)
How to integrate anthropology and neuroscience in a natural context? Proposals for a bio-social anthropology
Comments: Pierre Délégé (CNRS/LAS)

Saturday 27 October 10h Salle des Actes - Bridging 1st and 3rd person approaches (chair: Raphaël Millière)

Raphaël Millière (University of Oxford)
Multidimensional approaches to consciousness

Christopher Timmermann (Imperial College London)
Novel approaches in the bridging of first person reports and neuronal activity in transitions of conscious states

Enzo Tagliazucchi (University of Buenos Aires / INSERM)
From molecules to consciousness: towards an integrative neuroscience of psychedelics

26-27 October - École normale supérieure (Paris, 45 rue d'Ulm)
